Profile

Noah Williams is a distinguished Software Engineering Leader with an 18-year tenure in the technology industry, where he has excelled in leading both remote and in-office engineering teams. His expertise spans across software development, process innovation, and enhancing team collaboration. He is highly proficient in programming languages such as Ruby, Python, JavaScript, TypeScript, and Elixir, alongside deep expertise in various front end frameworks. Noah's significant experience in data science and machine learning has enabled him to spearhead successful deployments of scalable AI solutions and innovative data model development.

Work History

DataKernel: Director of Software Engineering (remote) — 2022 - Present

- Noah has transformed the engineering division into a key revenue pillar for DataKernel, rapidly expanding the customer base from inception to a robust community.
- He spearheaded the integration of cutting-edge AI technologies and the use of scalable vector databases, which significantly enhanced the product's capabilities and market positioning.
- Under his leadership, the team has seen a substantial growth in skill development, with a focus on achieving strategic project goals that have significantly influenced the company's direction.
- Noah also played a critical role in defining the company's long-term strategic initiatives, particularly in adopting AI technologies that have set new benchmarks within the industry.

DataKernel: Senior Software Engineering Manager (remote) — 2019 - 2022

- Directed the engineering strategy and operations in close collaboration with C-level executives, playing a pivotal role in shaping the company's technological trajectory.
- Managed diverse teams across multiple time zones in North America and Europe, creating an environment of transparency and mutual respect which enhanced team performance and morale.
- His initiatives in recruiting, mentoring, and retaining top talent have been crucial in fostering a culture of continuous improvement and high performance.

InnovPet: Founder & CEO (remote) — 2019 - 2022

- Noah founded InnovPet, a startup focused on innovative IoT solutions for pet care, including a revolutionary GPS tracking collar that significantly enhanced pet safety and owner peace of mind.
- He was responsible for overseeing product development from concept through execution, working closely with engineering teams and marketing partners to ensure a successful market entry.
- Successfully set up an advisory board, established production facilities overseas, and navigated the company through a successful initial funding phase, showcasing his leadership and entrepreneurial acumen.
- Built the initial version of the product leveraging MongoDB

EliteDevs: Engineering Manager (remote) — 2018 - 2019

- Noah was instrumental in formulating and executing strategic plans that enhanced inter-departmental coordination and trust, leading to better project outcomes.
- He managed multiple engineering teams, fostering a culture that balances productivity with innovation, and implemented goal-setting frameworks that aligned with the company's long-term goals.
- Was a bery hands on manager using ruby on rails and react to build out a new product.

PrintPack: Engineering Manager (remote) — 2016 - 2018

- Led the formation and development of a high-performance engineering team that was pivotal in increasing company revenue by 500% within two years.
- His leadership in integrating data analytics into business decision-making processes led to the development of a predictive modeling tool that revolutionized customer behavior analysis.

DriveAI: Senior Software Engineer (remote) — 2015 - 2016

- Developed and optimized a central API that significantly improved the functionality used by a large engineering team and thousands of users, enhancing overall system performance and user satisfaction.
- Implemented several critical enhancements, including advanced caching strategies that drastically reduced response times and system loads.

BetCraft: CTO — 2013 - 2015

- Led the technology strategy post-Series A funding, directly reporting to the board and guiding the company through a phase of significant technological advancement and network expansion.
- His strategic initiatives and partnerships significantly improved platform performance and expanded the company's market reach.
- Helped build his initial product using both React and Angular and got pretty good at it.

Education

MBA in Information Technology

London Business School - MBA

Advanced Leadership Techniques

University of London - Certification

Data Science Specialization

Coursera (Johns Hopkins University) - Certification

B.Sc. in Computer Science

University of Edinburgh - Bachelor's degree

Noah Williams is an ideal candidate for senior executive roles, particularly in companies seeking leadership with a robust blend of technical and strategic expertise.
